

*Dear Sirs!*

It *requires the cooperation* of many companies of various specializations and the most complex *coordination* of their activities *to create* and implement *modern technologies* in today's conditions.

Group of companies "CTG" launched an initiative in 2018 *to unite enterprises* of various fields of activity (research, design, engineering, manufacturing, construction, financial, consulting, etc.) in *the International consortium "Clean innovative technologies"* to solve these and related tasks. To date, the Consortium has more than *100 independent Partner* companies specializing in a variety of activities.

The main activity of the *International consortium "Clean innovative technologies"* is innovative development in the field of environmental safety and environmental protection.

The *"block of scientific and innovative companies"*, consisting of *about 40 organizations* that implement *"breakthrough" engineering developments* in a wide variety of market segments (including some of the competencies) occupies a leading place in its development.

The *"block of design and construction companies"*, which includes about 20 enterprises in this area and allows for the construction of any *turnkey* projects, plays an equally important role in the structure of the Consortium.

The presence of a *"block of companies from industrial, consulting, financial and other business sectors"* in the Consortium allows it to quickly solve the widest range of tasks assigned to it by the Customer.

The Consortium has *three permanent Project offices*:

- *"Treatment* (cleaning, washing, drying, anticorrosion, anti-ice) of *hard* surfaces of various configurations and purposes, *cleaning of water and air from any contamination"*;
- *"Processing of solid, liquid and gaseous waste of various origin, including Ist and IInd hazard classes"*;
- *Creating a comfortable living environment human in extreme natural and climatic conditions,*

that coordinate the work of Partners in these areas.

It should be emphasized that *the consolidation* of intellectual, design, production, construction, financial, consulting and other *capabilities* of the Consortium *Partners* will allow everyone to gain *significant competitive advantages* in competitions, *tenders*, etc. for the supply of products/services of their own profile, *the quality* and *timing* of which, in turn, will definitely and objectively *improve* due to proven Partners. In addition, we are

convinced that partnership relations in *the Consortium* will significantly increase the sales of their products to each of them.

Based on the above, we invite You and Your company, *dear sirs*, to cooperate within the framework of the International consortium "*Clean innovative technologies*" which was created by us.

Respectfully,

Chairman of the Supervisory Board,

d.t.s, professor, honored scientist of the RF
